---	---	---

### DEVOIR DE CONTROLE N°1

#### PART ONE: LANGUAGE TASKS (15pts)

##### TASK ONE: Choose the right option: (5pts)

E-cars don't emit climate damaging greenhouse gases or health- (1) (**harmful – harmed – harming**) nitrogen oxide. They're quiet and (2) (**easy – easiest – easily**) to operate. Electric vehicles seem to have a lot of advantages (3) (**anti – against – over**) cars that run on gasoline or diesel. (4) (**Indeed – In spite of – In addition to**), with revelations about auto industry cheating on emissions tests, many consumers feel deceived - and are looking for ways to escape becoming a victim of the deception. One way to do so would be to (5) (**slash – switch – adopt**) to an electric vehicle. In many cases, governments are encouraging this transition. E-cars offer a quick solution to two societal (6) (**supplies – crises – needs**): reaching national targets for reducing greenhouse gas emissions, and (7) (**tackling – striving – harnessing**) air pollution in city centers. Germany, (8) (**who – whose – which**) has pledged to reduce carbon emissions by 40 percent by 2020 compared to 1994 levels, aims to have one million electric cars on road by then. The environmental organization Greenpeace has, however, warned that the benefits of a conversion to e-cars would be limited if it (9) (**results – result – resulted**) in more personal car ownership. (10) (**Instead – While – Though**), governments should focus on electrifying public transport.

##### TASK TWO: Put the bracketed words in the correct tense and/or form: (5pts)

The Moroccan city of Ouarzazate has played host to big-budget location shots in Lawrence of Arabia, The Mummy, The Living Daylights and even Game of Thrones. Now the trading city, (1) (**nickname**) the “door of the desert”, is the centre for another blockbuster: a complex of four linked solar mega-plants that, alongside hydro and wind, (2) (**help**) provide nearly half of Morocco’s electricity from (3) (**renew**) by 2020 with, it is hoped, some spare to export to Europe. When the full complex is complete, it will be the (4) (**large**) concentrated solar power (CSP) plant in the world. It will have the advantage of being able to continue producing power even when the sun (5) (**go down**). In fact, the potential for solar power from the desert (6) (**know**) for decades. In the days after the Chernobyl nuclear accident in 1986 the German particle (7) (**physics**) Gerhard Knies, (8) (**calculate**) that the world’s deserts receive enough energy in a few hours to provide for humanity’s power (9) (**consume**) for a whole year. The challenge though, has been (10) (**capture**) that energy and transporting it to the population centres where it is required.

**TASK THREE: Express the following sentences differently beginning as indicated on the answer sheets: (5pts)**

- 1) Unless you return the product, we won't refund you.
- 2) She didn't see a doctor despite being seriously ill.
- 3) They managed to solve the problem.
- 4) You'll find this bargain nowhere.
- 5) We got lost because we didn't have a map.
- 6) "I'm sorry I've broken the vase", said John.
- 7) Our company bought a mini-bus with 24 seats.
- 8) The police are carrying out an investigation about the missing of a famous journalist.
- 9) It is not necessary to call a doctor immediately.
- 10) It's a pity we didn't catch the one o'clock train.

**PART TWO: WRITING TASKS (5pts)**

**TASK ONE: Find and correct the five mistakes in this paragraph: (2.5pts)**

The rate at wich the world consumes fossil fuels is not standing still; it is increasing as the world's population increase, and as standards living rise in both rich and poor countries. therefore, fossil fuels will run out much early.

**TASK TWO: Reorder the scrambled sentence parts to get a meaningful paragraph: (2.5pts)**

- a) low-carbon replacements for the liquid fossil fuels that
- b) were increasing food prices and were often as polluting as fossil fuels.
- c) Ten years ago biofuels were seen as ideal,
- d) But concerns grew that first-generations biofuels, made from food crops,
- e) power the majority of the world's transport systems.
